└─────────────────┘        └─────────────────────┘
```

- Main Code
- create tables
- read csv files and transform to SQL database
- collect Routes
- Database Session
- Information Route
- Production Route
- Request to Endpoint
- Response from APP
- Actor
- Run APP
- CRUD for Information
- CRUD for Production
- Information Models
- Information Schema for output
- Production Models
- Production Schema for output
